

This specialized formulation is a floating solvent system possessing excellent degreasing and deodorizing properties. This product will clean vertical surfaces on lift stations, wet wells, and similar treatment facilities. Added directly to wet wells, it effortlessly cleans and degreases as the water level fluctuates. It also "seals" offensive odors, containing these odors emitted from lift stations. THIS PRODUCT ALSO MAKES AN EXCELLENT GENERAL PURPOSE DEGREASER AND ASPHALT RELEASE AGENT.

USE TO:

Remove accumulated sewage, grease, oils, fats, calcium soaps, fatty acids, and magnesium soaps that have formed deposits on walls. This product will help return station to optimum efficiency by removing or substantially reducing this debris which can reduce volume capacity of wet wells and emit offensive odors.

DIRECTIONS FOR USE

Lift stations: Pour directly into manhole or station pit. Use approximately 32 oz. (1 quart) for each square foot of water surface, or until a layer of 2-4 inches of Super Grape is floating on the water's surface. This special non-emulsifiable formula stays on the surface for continuous action.

General Degreasing: Apply by spraying, dipping, wiping, brushing or soaking.

Asphalt Release Agent & Remover: Pre-spray truck beds and equipment for easiest release. Post spray asphalt accumulated on equipment to soften for easier removal.

SUPER GRAPE

HIGH FLASH INDUSTRIAL SOLVENT FOR DEGREASING & DEODORIZING LIFT STATIONS

- **LONG LASTING DEODORIZER**
- **MUNICIPAL/INDUSTRIAL
DEGREASER**
- **ASPHALT RELEASE AGENT**
